CATALOGUE 2024

SEATS AND ACCESSORIES

1ST VERSION FROM 1ST JANUARY

SEATS

Jecko Racing Seats' seats are an avant-garde product in the kart world with regards to both the technology and the design.

Jecko produces the seats in two models:
• FA: totally designed by Jecko, the seat is characterised for the legs support zone.
• K: is the tradtional seat designed by Jecko.

Team and drivers'experience allowed us to develop our seats, size and shape are improved and renovated, seats end up being more ergonomic, more elastic and of high quality.

JECKO choose and selected 5 seats types:

EXTREME | SOFT | STANDARD | CLOSEDGE | XLIGHT

• EXTREME: this is the softest and lightest line, used only in group A/B size;
• SOFT: the softline is produced with white fibers;
• STANDARD: is the best line in every atmospheric condition;
• CLOSEDGE: our patend system, makes up the closure of the seat's edge which increases the stiffness.
• XLIGHT: the special seat made in carbon fiber

The peculiar shape of the seats has been achieved after an in-depth study of the ergonomics and the high level of tension/stress originating from the modern kart driving.

FLOORTRAYS

Floortray is a fundamental part of a kart as it can be compared to all intents and purpose with a single-seated car's one.
It occupies a high percentage of framework area, affecting its rigidity and consequently its performance.
To satisfy those requirements, JECKO has devised a floortray that's very soft and light thanks to combination of its aesthetics and the use of high quality raw materials.
Karts become very original and dynamic with our colored floortrays, you can find them in Silver, Orange, Yellow and Blue.

Factory can personalize their floortrays with their own livery to match the kart aesthetics.

SPROCKET PROTECTOR

Jecko Sprocket Protector stands out for its unique aesthetic but also for its robustness, flexibility and lightness. It's offered in Silver, Blue, Yellow and Orange with 180, 200 and 220 mm of diameter. In 2023 a New Sprocket Spacer is introduced: the carbon sprocket protector, it's lighter than the silver and colored ones.

Jecko Sprocket Spacer is made of aluminium and it's 6 mm tight, it's available individually or in kit.

Jecko sprocket Kit consists of: 2 Sprocket Protectors 180, 200 or 220 and 1 Sprocket spacer. You can choose the colors that best suits on your kart.
